

DO ALL FACTORS IMPACT JUDGES AND FANS THE SAME WAY?

AGE (Pearson r):

Judges: $r = -0.354$ Fans: $r = -0.239$ Judge 1.48× stronger $p_{diff} = 0.0370$

INDUSTRY (η^2):

Judges: $\eta^2 = 0.063$ Fans: $\eta^2 = 0.015$ Judge 4.25× stronger $p_{diff} = 0.0710$

PRO PARTNER (η^2):

Judges: $\eta^2 = 0.115$ Fans: $\eta^2 = 0.028$ Judge 4.07× stronger $p_{diff} = 0.0130$

HOMESTATE (η^2):

Judges: $\eta^2 = 0.041$ Fans: $\eta^2 = 0.023$ Judge 1.82× stronger $p_{diff} = 0.5670$

COUNTRY/REGION (η^2):

Judges: $\eta^2 = 0.014$ Fans: $\eta^2 = 0.003$ Judge 3.96× stronger $p_{diff} = 0.3250$

CONCLUSION:

Age, industry, pro partner, homestate, and country all tested.

Stronger effects on judges than fans for most factors; pro partner largest discrepancy.
